Sep 16 10:09 varhovx it freezes on the dock/undock thing
 Sep 16 10:10 webtesa final question - do you ever "kill" the tuner
 Sep 16 10:10 webtesa by that I mean do a right click on the tuner icon, and choose exit
 Sep 16 10:10 varhovx when it freezes... i kill the virtula machine...
 Sep 16 10:10 webtesa (do you use dock all/undock all?)
 Sep 16 10:10 varhovx not all nope...just ctrl d
 Sep 16 10:10 webtesa what, via task manager?
 Sep 16 10:10 varhovx yes
 Sep 16 10:10 webtesa ahhh - that's a new one using ctrl D
 Sep 16 10:11 webtesa right - first off I may post that in the bug file
 Sep 16 10:11 webtesa secondly, if you ever want to stop IC/tuner, please please don't do it via the task manager
 Sep 16 10:11 webtesa best way is to have the Tuner window open - do a right click on the blue icon and choose open
 Sep 16 10:12 webtesa then stop IC by doing a right click on the Interchange entry and choosing stop

Channel Edit User Window Help

15:22 bernarda	Well, like I said, I've got a CD of the latest version, so if anybody in Chicago wants to try it... is it possible to convert a RH8.x system to system to mandrake6? I was hoping it would be just a matter of upgrading RPMs, but it might be more involved.
15:24 kutyvi	David: I'll keep your CD offer in mind. Need to find hardware first.
15:44 bernarda	k

Tuesday September 21, 1999

08:20 munayse	Hey lamuria, What do you mean linux doesn't work with that modem?
08:22 klossou	does the built in modem work? I think that's the crux of the matter here
08:22 munayse	It's the modem
08:24 lamuria	yeah...that's what I meant, the modem
08:24 lamuria	It's a winmodem, hence...
08:24 munayse	I understand
08:24 jinksto	HEH
08:24 munayse	Hey jinksto
08:25 jinksto	Howdy do
